

No Chance for Lies

# Why masks?

Mouth-to-nose protection (MNP) can disrupt the psychological development of children and adolescents. Interpersonal relationships and interactions with teachers are disturbed by the the MNP are disturbed. Successful learning requires a positive environment. Masks in the school building, during breaks, and in the school environment destroy this basic positive attitude. Mandatory masks trample on children's human rights.

Not only the physical but also the mental health and development of the students is endangered. Laboratory tests of worn MNSs, it was discovered that more than 85 different types of bacteria live on the MNps and are repeatedly inhaled. These germs can cause everything from respiratory diseases to meningitis.

## We are not super spreaders!

Die aktuelle Verschärfung der Maskenregelungen mittels Hygieneplan durch die Regierung ist hinsichtlich der geringen Wirksamkeit von MNP unangemessen, dass Schulschließungen auf das Ausbreitungsgeschehen keine Auswirkungen haben, kann auch in einer Studie aus Sachsen nachgelesen werden. **Kinder wirken eher als Bremsklötze der Infektion.** Die Verbreitung des Coronavirus in Kitas, Schulen und Familien wurde bisher offenbar überschätzt. Eine Studie der Medizinischen Fakultät der Technischen Universität Dresden lieferte weder einen Beleg dafür, dass sich das Virus in Schulen besonders schnell verbreitet, noch dafür, dass es durch Kinder besonders häufig übertragen wird.

FAZ: „Kinder wirken eher als Bremsklötze der Infektion“, von Stefan Locke, 13.07.20

## What children really need...

➤ **Children need a smile.**  
Children want to see faces and show theirs as well. Wearing any kind of mask harms them physically and psychologically. Any mouth and nose protection restricts inhalation and exhalation. Masks weaken the immune system by increasing CO2 rebreathing. The resulting acidification of the blood, as well as increased exposure to mold and bacteria, can be disastrous for children.

➤ **Children need closeness and warmth.**  
Children need to play together. Distance massively harms their health and development. Numerous renowned experts from the fields of virology, immunology and epidemiology consider the measures taken to be counterproductive and recommend rapid natural immunization of the general population and protection of at-risk groups. **There is no need for compulsory vaccination!**

➤ **What strengthens the immune system?**  
Healthy food, exercise in nature, sun, fresh air, drinking water, enough sleep, mental strengthening, relaxation, closeness, warmth, friends and joy of life.

We children have  
**SUPER POWERS**  
even **WITHOUT** a mask!
